

LJN

PT. Lintas Jaringan Nusantara

Backbone connectivity for partners that intend to grow.

LJN is a Kominfo-licensed Indonesian national ISP, operating its own fiber backbone since 2004. We are the on-the-ground partner for international carriers, wholesale providers, enterprise network operators, cloud / CDN / edge platforms, and global teams entering the Indonesian market — with one licensed local counterparty for interconnect, last-mile delivery, billing, SLA, and field operations.

An operator, not a reseller.

LJN is a Kominfo-licensed Indonesian national ISP, operating its own fiber backbone since 2004. We are the on-the-ground partner for international carriers, wholesale providers, enterprise network operators, cloud / CDN / edge platforms, and global teams entering the Indonesian market — with one licensed local counterparty for interconnect, last-mile delivery, billing, SLA, and field operations.

99.9% **SLA Uptime**
Written, with credit schedule.

100G **Last-mile**
Up to 100 Gbps per link.

100+ **Cities**
From Java through Sulawesi.

20+ **Years**
Continuous operation since 2004.

FROM THE DIRECTOR'S DESK

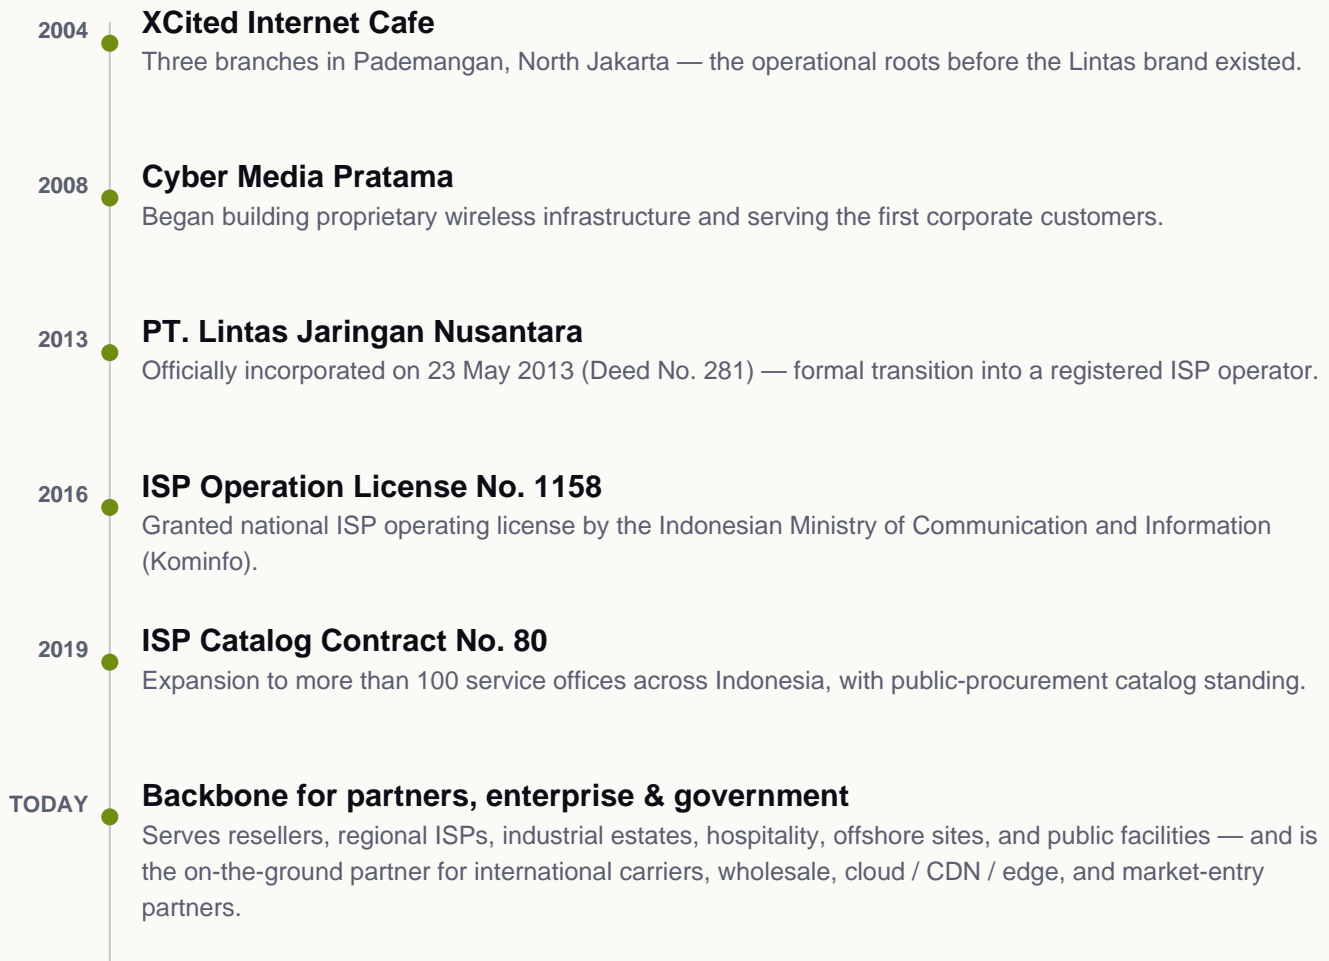

"For global partners, the value we offer is not just a fiber port. It is a single local accountable counterparty — licensed, on-net, and operationally serious — who can stand behind delivery to your end user in Indonesia."

Kristoforus Hakim

Director · PT. Lintas Jaringan Nusantara

Twenty-plus years, one trajectory.

From a small access operator in North Jakarta to a national backbone provider with 100+ service offices — same domain, same leadership line, no rebrand churn.

Four global partnership tracks.

FOR INTERNATIONAL CARRIERS & WHOLESALE

Carrier Interconnect & IP Transit

Cross-connect at carrier-neutral facilities in Jakarta, BGP peering (settlement-free or paid), and wave / Ethernet / IPLC delivery to and from Indonesia.

- 1G / 10G / 100G ports per link
- BGP, multi-homing, IRR-validated prefixes
- Joint diversity planning across submarine and terrestrial paths
- Settlement-free or paid peering subject to mutual policy

FOR RESELLERS, REGIONAL ISPS & GLOBAL AGGREGATORS

Wholesale Bandwidth (in-country)

Hand off capacity to LJN and reach Indonesian end users — or take wholesale tier pricing from us for global aggregation.

- CIR 1:1 wholesale capacity, tiered pricing
- Symmetric, no contention, no FUP, no throttling
- White-label / co-branded options per region
- PRTG monitoring access for the partner's NOC

FOR GLOBAL ENTERPRISE CUSTOMERS

Enterprise On-net Delivery

One licensed Indonesian counterparty for global enterprises with Indonesian sites — dedicated internet, MPLS, metro-Ethernet on-net.

- Dedicated internet with public & private IP, BGP
- MPLS L2 / L3 and metro-Ethernet for site-to-site
- Dual-path fiber and automatic failover where available
- One local SLA, one local invoice, one local contact

FOR PLATFORMS PLACING EDGE IN INDONESIA

Cloud / CDN / Edge Presence

Carrier-neutral colocation, cross-connect to local IXes and Tier-1s, capacity for cache fill and event spikes, plus remote-hands.

- Diverse power and cooling, NOC-adjacent
- Cross-connect to local IXes and Tier-1s on-net
- Capacity for cache fill, prefetch, event spikes
- ISO 27001 — audit-ready operational process

100+ cities. 100G last-mile. One backbone.

From industrial estates in Karawang to offshore sites in Sulawesi — the same capacity, SLA, and field operations baseline serves global wholesale partners and on-net enterprise alike.

VERTICALS WE ALREADY OPERATE

Reseller & Regional ISPs

Wholesale partners reselling to end users.

Industrial Estates

Multi-tenant industrial parks, manufacturing.

Hospitality & High-rise

Hotels, integrated resorts, mixed-use.

Mining, Oil & Gas

Remote and offshore operations.

Cloud / CDN / OTT

Edge nodes, cache fill, event spikes.

Public Sector & Health

Regional government, RSUD, education.

WHY GLOBAL PARTNERS PICK LJN

Licensed national operator

ISP Operation License No. 1158 (Kominfo) and ISP Catalog Contract No. 80. We are the legal counterparty for delivery, billing, and regulator-facing reporting in Indonesia.

Own backbone, own last-mile

Fiber backbone with carrier-neutral data center presence in Jakarta, regional rings, and last-mile fiber up to 100 Gbps per link. CIR 1:1 — no contention, no FUP.

NOC 24/7 with engineer escalation

You speak with engineers, not a call center. Defined escalation path, written SLA at 99.9%, and compensation language for missed targets.

Twenty-plus years, single ownership

Operating since 2004, incorporated as PT in 2013, led by a single technical leadership line — no rebrand churn, no exit-flip risk for long-term partners.

License, certifications, and contact.
